

Assignment 10

KD1_86940_parag

Q1).Write a query that produces all pairs of salespeople who are living in the same city. Exclude combinations of salespeople with themselves as well as duplicate rows with the order reversed.

```
mysql> select a.sname,b.sname,a.city from salespeople a,salespeople b where a.city=b.city and a.sname>b.sname;
+-----+-----+-----+
| sname | sname | city  |
+-----+-----+-----+
| Peel  | Motika | London |
+-----+-----+-----+
```

Q2).Write a query that produces the names and cities of all customers with the same rating as Hoffman.

```
/kd1_86940_parag>select a.cname,b.city from customers a, customers b
-> where a.rating = b.rating and b.cname = 'Hoffman' and a.cname != 'Hoffman';
+-----+-----+
| cname  | city  |
+-----+-----+
| Clemens | London |
| Pereira | London |
+-----+-----+
```
